

Pebblestone Lane BWA Lifted on 5/1/17 – no bacteria was present and chlorine levels were acceptable.

Pebblestone Lane Boil Water Advisory (BWA).

Earlier today, May 31, 2017, an AT&T contractor damaged a City of Cumming waterline along Pebblestone Lane in Cool Springs Subdivision off of Hendrix Road. The waterline was repaired and flushed as of 4:30 pm and a bacteria sample was taken. The results will be reported within 24 hours and the BWA will be lifted once the results are acceptable. Again this Boil Water Advisory is a precautionary measure to protect the public health in the event any contaminants entered the water line at the point of the line break.
